ROCK YOUR BOAT

Made for iPod iPhone

Take control and experience a revolution in boating entertainment with SonicHub™, the world's first marine audio hub and docking station with a stunning high definition, waterproof colour display.

SonicHub™ makes your music more accessible when on the water, with a direct link to your entire music collection via your iPhone, iTouch, iPod or USB device, without the need for a stereo head. You can also catch the latest weather forecasts or listen to your favourite radio show through the built in AM/FM tuner.

Featuring four 50W per channel high power amplifiers, SonicHub™ gives you a sensational sound and visual control experience. Simple to install, SonicHub™ integrates seamlessly with Simrad NSE and Lowrance HDS high-resolution, colour display screens with intuitive and stylish graphical user interface.

Enjoy high quality sound with a system specifically designed for the challenging marine environment. The unique docking station provides a safe and waterproof casing, protecting your iPod or USB device from the elements.

SIMRAD

Master your music with Simrad SonicHub™

SonicHub™ integrates flawlessly with the award winning Simrad NSE multifunctional displays to provide the exceptional quality and performance you would expect from any Simrad product.

Entertainment at your fingertips

The stunning design combines with a simple to operate user interface, so that audio functions can be operated at the touch of button on either 8 or 12-inch high definition screens.

In keeping with the award winning Simrad NSE user interface, selecting and playing music with your Simrad SonicHub™ via familiar menu systems and icons couldn't be simpler.

Simrad SonicHub™ Multi-Zone technology

Perfect for the larger vessel, the Simrad SonicHub™ system provides multi-zone technology, offering independent sound control in up to three areas on board.

So whether you're bathing on deck, relaxing in the saloon or dining al fresco, multi-zone technology gives you access and control over your music using large screen, sunlight viewable displays.

LOWRANCE®

Ultimate complete audio integration with Lowrance SonicHub™

With the innovative Lowrance High Definition System (HDS) you can enjoy all the benefits of the SonicHub™ docking station on a crystal clear display.

Easy to control and install

The intuitive HDS interface combines a sunlight viewable colour screen (up to 10”) with the ultimate in functionality and ease of control.

SonicHub™ is simple to install with no need to cut holes in the helm for an audio head unit, making it the perfect choice for craft with limited space. Just hook up the SonicHub™

to your Lowrance HDS using the supplied NMEA2000 backbone, plug in the speakers and you're ready to Rock Your Boat™

Stylish speaker package

The Lowrance SonicHub™ system comes with stylish, marine grade 6.5" high power 200W low magnetic speakers for the ultimate in music on the move. With the option to add a subwoofer, the Lowrance SonicHub™delivers maximum performance audio for a minimal price.
